

Robins Class Topic Homework
Date sent W/C 2nd September
Please return by 14th October

Imagine you could create a new planet.

What would it be called?

What would it look like?

Would there be any living things on this planet? What? Who?

Is it hot or cold on this planet?

What is special about this planet?

You can present this homework however you choose. Perhaps you could make a model, you could use a paper plate to show how your planet looks, you could draw a picture with labels, you could use playdough to make your planet. Be creative and have fun!

Where does your planet fit into the solar system?
